MedicalDirector

PI01 Birthweight recorded

Babies born in the 12 months up to the census date.

Data entry field:
1. Patient's record
2. Tools> Toolbox>weight
3. Paediatric percentile charts
4. Enter value for weight
5. Save.

PI02 Birthweight results

Babies born in the 12 months up to the census date & whose birth weight was **low** (< 2500gms), **normal** (≥2500gms & < 4500gms) & **high** (≥4500gms).

Data entry field: Same as PI01.
Disaggregation: Low, normal & high.

PI03 Indigenous Health Assessment completed

Clients with a current completed Indigenous health assessment, consisting of:
- Aged **0-14** with an assessment completed in the last 12 months or
- Aged **15 & over** with an assessment completed in the last 24 months.

Data entry field: n/a.
Disaggregation: Age,* Gender, type of health assessment.

PI05 HbA1C recorded (Type 2 Diabetes)

Type 2 diabetes clients & HbA1c recorded within previous 6 or 12 months.

Data entry field:
1. Result
2. Add
3. Subject field key HbA1
4. Key readings
5. Save.

Disaggregation: Age,* Gender, Duration.

PI06 HbA1C results (Type 2 Diabetes)

Type 2 diabetes clients & HbA1c results recorded within previous 6 or 12 months.

Data entry field:
1. Patient's record
2. Clinical
3. Diabetes Record
4. Add values
5. Save.

Disaggregation: Age,* Gender, Duration & HbA1c results.

PI07 Chronic Disease Management Plan

Type 2 diabetes clients & received a GP Management Plan (MBS Item 721) within the previous 24 months up to the census date.

Data entry field: Refer PI03 & PI05.
Disaggregation: Age,* Gender, type of chronic disease management plan.

PI09 Smoking Status recorded

Clients aged ≥ 11 whose smoking status was recorded in the last 24 months.

Data entry filed:
1. Patient's record
2. Patient
3. Details
4. Smoking tab > Smoking status
5. Save.

Disaggregation: Age,# Gender.

PI10 Smoking Status result

Clients aged 11 & over whose smoking status was recorded in the 24 months up to the census date was: **Current smoker, Ex-smoker & never smoked**.

Data entry field: Same as PI09.
Disaggregation: Age,# Gender, Smoking status results.

PI11 Smoking during pregnancy

Female clients who gave birth in the last 12 months whose smoking status result during pregnancy was recorded.

Data entry field:
1. Female patient's record
2. Obstetric tab
3. Add new item
4. Add gestational age
5. Add smoking status as per PI09.

Disaggregation: Age,$ Smoking status result.

PI12 Body Mass Index (BMI)

Clients aged ≥ 18 who had their BMI classified as **underweight** (<18.50 kg/m2), **normal weight** (>=18.50 kg/m2 but <=24.99 kg/m2), **overweight** (>=25 kg/m2 but <=29.90 kg/m2), **obese** (>=30 kg/m2), & not calculated in the 24 months up to the census date.

Data entry field:
1. Pregnancy record
2. Record visit
3. Date as visit date
4. Save.

Disaggregation: Age,^ Gender, BMI result.

PI13 First Antenatal care visit

Female clients who gave birth in the 12 months & their gestational age recorded at their first antenatal care visit.

Data entry filed:
1. Obstetric History
2. Add
3. Complete details (Gestational age)
4. Save.

Disaggregation: Age,$ Gestational age group.

MedicalDirector

PI14 Influenza immunisation

Clients aged 6 months and over who are immunized against influenza within the previous 12 months.

Data entry field:
1. Patient's record
2. Immunization tab
3. Add new item
4. Enter date, type, site & sequence
5. Save.

Disaggregation: Age[b], Gender.

PI16 Alcohol consumption recorded

Proportion of regular clients aged 15 & over whose alcohol consumption status was recorded in the 24 months up to the census date.

Data entry field
1. Patient's record
2. Assessment
3. Audit-C
4. unput data
5. Save.

Disaggregation: Age[@], Gender.

PI17 Audit-C result recorded

Proportion of regular clients aged 15 & over who had an AUDIT-C with result recorded in the 24 months up to the census date of: ≥4 in males & ≥3 in females & < 4 in males & < 3 in females.

Data entry field: Same as PI16

Disaggregation: Age[@], Gender, AUDIT-C result.

PI18 Kidney function test recorded
(Type 2 diabetes or CVD)

Clients aged ≥ 18 with Type 2 diabetes &/or CVD who had a kidney function test recorded in the last 12 months (eGFR & ACR).

Data entry field:
1. Patient's record
2. Tools > Toolbox
   > Renal Function Calculator
3. Enter values.

Disaggregation: Age[^], Gender, Chronic disease, Test.

PI19 Kidney function results
(Type 2 diabetes or CVD)

Clients aged ≥ 18 with Type 2 diabetes &/or CVD who had a kidney function test result recorded in the last 12 months (eGFR & ACR)

Data entry field: Same as PI18

Disaggregation: Age[^], Gender, Chronic disease, Risk result category.

PI20 CVD risk assessment factors

Clients aged 35-74 with no known CVD & had all necessary CVD risk factors assessed in the last 24 months.

Data entry field:
1. Patient's record
2. Tools > Toolbox > Blood pressure
3. Record smoking status as per PI 09
4. Total cholesterol & HDL – Patient's record > Clinical > Diabetes record > Add values.

Disaggregation: Age[+], Gender.

PI21 CVD risk assessment details

Clients aged 35-74 with no known CVD & had all necessary CVD risk factors assessed in the last 24 months as **High, moderate,** or **low**.

Data entry field: Same as PI20

Disaggregation: Age[+], Gender, CVD risk assessment.

PI22 Cervical screening recorded

Clients aged 25-74 who have not had hysterectomy & who had an HPV test within the past 5 years.

Data entry field:
1. Female patient's record
2. Cervical screening tab
3. Select new item
4. Add values
5. Add.

Disaggregation: Age[α]

PI23 Blood pressure recorded
(Type 2 diabetes)

Type 2 diabetes clients who had a BP recorded in the last 6 months

Data entry field:
1. Patient's record
2. Tools> Toolbox> blood pressure > enter & Save.

Disaggregation: Age[α], Gender.

PI24 Blood pressure result

Type 2 diabetes clients who had a BP recorded in the last 6 months & was ≤ 140/90 mmHg.

Data entry field:
1. Patient's record
2. Tools > Toolbox > Blood pressure > enter values & click Save.

Disaggregation: Age[*], Gender.

PI25 Sexually transmissible infections

Clients aged 15-34 who were tested for one or more STIs within previous 12 months.

Data entry field: n/a.
Disaggregation: Age[£], Gender.
