

PI01 Birthweight recorded

Babies born in the 12 months up to the census date.

Data entry field:

1. Report > National KPI > PI01 Birth Weight Recorded;
2. Report > National KPI > PI01 Birth Weight Recorded Patients.

PI02 Birthweight results

Babies born in the 12 months up to the census date & whose birth weight was **low** (< 2500gms), **normal** (≥2500gms & < 4500gms) & **high** (≥4500gms).

Data entry field:

1. Report > National KPI > PI02 Birth Weight Categories;
2. Report > National KPI > PI02 Birth Weight Categories Patients.

Disaggregation: Low, normal & high.

PI03 Indigenous Health Assessment completed

Clients with a current completed Indigenous health assessment, consisting of:

- Aged **0-14** with an assessment completed in the last 12 months or
- Aged **15 & over** with an assessment completed in the last 24 months.

Data entry field:

1. Report > National KPI > PI03 Health Checks;
2. Report > National KPI > PI03 Health Checks Patients.

Disaggregation: Age[‡], Gender, type of health assessment.

PI05 HbA1C recorded (Type 2 Diabetes)

Type 2 diabetes clients & HbA1c recorded within previous 6 or 12 months.

Data entry field:

1. Report > National KPI > PI05 Diabetes HbA1c Tests;
2. Report > National KPI > PI05 Diabetes HbA1c Tests Patients.

Disaggregation: Age[‡], Gender, Duration.

PI06 HbA1C results (Type 2 Diabetes)

Type 2 diabetes clients & HbA1c results recorded within previous 6 or 12 months.

Data entry field:

1. Report > National KPI > PI06 Diabetes HbA1c Results 6 months;
2. Report > National KPI > PI06 Diabetes HbA1c Results 12 months;
3. Report > National KPI > PI06 Diabetes HbA1c Results Patients.

Disaggregation: Age[‡], Gender, Duration & HbA1c results.

PI07 Chronic Disease Management Plan

Type 2 diabetes clients & received a GP Management Plan (MBS Item 721) within the previous 24 months up to the census date.

1. Report > National KPI > PI07 Diabetes GP Management Plan;
2. Report > National KPI > PI07 Diabetes GP Management Plan Patients.

Disaggregation: Age[‡], Gender, type of chronic disease management plan.

PI09 Smoking Status recorded

Clients aged ≥ 11 whose smoking status was recorded in the last 24 months.

Data entry field:

1. Report > National KPI > PI09 Smoking Status;
2. Report > National KPI > PI09 Smoking Status Patients.

Disaggregation: Age[#], Gender.

PI10 Smoking Status result

Clients aged 11 & over whose smoking status was recorded in the 24 months up to the census date was: **Current smoker, Ex-smoker & never smoked.**

1. Report > National KPI > PI10 Smoking Status Result;
2. Report > National KPI > PI10 Smoking Status Result Patients.

Disaggregation: Age[#], Gender, Smoking status results.

PI11 Smoking during pregnancy

Female clients who gave birth in the last 12 months whose smoking status result during pregnancy was recorded.

Data entry field:

1. Report > National KPI > PI11 Smoking in Pregnancy;
2. Report > National KPI > PI11 Smoking in Pregnancy Patients.

Disaggregation: Age[§], Smoking status result.

PI12 Body Mass Index (BMI)

Clients aged ≥ 18 who had their BMI classified as **underweight** (<18.50 kg/m²), **normal weight** (≥18.50 kg/m² but ≤24.99 kg/m²), **overweight** (≥25 kg/m² but ≤29.90 kg/m²), **obese** (≥30 kg/m²), & not calculated in the 24 months up to the census date.

Data entry field:

1. Report > National KPI > PI12 Overweight;
2. Report > National KPI > PI12 Overweight Patients.

Disaggregation: Age[‡], Gender, BMI result.

PI13 First Antenatal care visit

Female clients who gave birth in the 12 months & their gestational age recorded at their first antenatal care visit.

Data entry field:

1. Report > National KPI > PI13 Antenatal Care;
2. Report > National KPI > PI13 Antenatal Care Patients.

Disaggregation: Age[§], Gestational age group.

References:

^{*}Age: 0-4, 5-14, 15-24, 25-34, 35-44, 45-54, 55-64 & 65+ years.

[#]Age: 11-14, 15-24, 25-34, 35-44, 45-54, 55-64 & 65+ years.

[§]Age: < 20, 20-34, 35+ years.

[‡]Age: 18-24, 25-34, 35-44, 45-54, 55-64 & 65+ years.

PI14 Influenza immunisation

Clients aged 6 months and over who are immunized against influenza within the previous 12 months.

Data entry field:

1. Report > National KPI
> PI14 Influenza Immunisations;
2. Report > National KPI
> PI14 Influenza Immunisations Patients.

Disaggregation: Age^b, Gender.

PI16 Alcohol consumption recorded

Proportion of regular clients aged 15 & over whose alcohol consumption status was recorded in the 24 months up to the census date.

Data entry field

1. Report > National KPI
> PI16 Alcohol Status;
2. Report > National KPI
> PI16 Alcohol Status Patients.

Disaggregation: Age^g, Gender.

PI17 Audit-C result recorded

Proportion of regular clients aged 15 & over who had an AUDIT-C with result recorded in the 24 months up to the census date of: ≥4 in males & ≥3 in females & < 4 in males & < 3 in females.

Data entry field

1. Report > National KPI > PI17 AUDIT-C;
2. Report > National KPI > PI17 AUDIT-C Patients.

Disaggregation: Age^g, Gender, AUDIT-C result.

PI18 Kidney function test recorded (Type 2 diabetes or CVD)

Clients aged ≥ 18 with Type 2 diabetes &/or CVD who had a kidney function test recorded in the last 12 months (eGFR & ACR).

Data entry field:

1. Report > National KPI
> PI18 Kidney Function;
2. Report > National KPI
> PI18 Kidney Function Patients.

Disaggregation: Age^g, Gender, Chronic disease, Test.

PI19 Kidney function results (Type 2 diabetes or CVD)

Clients aged ≥ 18 with Type 2 diabetes &/or CVD who had a kidney function test result recorded in the last 12 months (eGFR & ACR)

Data entry field:

1. Report > National KPI
> PI19 Kidney Function Results;
2. Report > National KPI
> PI19 Kidney Function Results Patients.

Disaggregation: Age^g, Gender, Chronic disease, Risk result category.

PI20 CVD risk assessment factors

Clients aged 35-74 with no known CVD & had all necessary CVD risk factors assessed in the last 24 months.

Data entry field:

1. Report > National KPI
> PI20 CVD Risk Factors;
2. Report > National KPI
> PI20 CVD Risk Factors Patients.

Disaggregation: Age^g, Gender.

PI21 CVD risk assessment details

Clients aged 35-74 with no known CVD & had all necessary CVD risk factors assessed in the last 24 months as **High, moderate, or low.**

Data entry field:

1. Report > National KPI
> PI21 CVD Risk;
2. Report > National KPI
> PI21 CVD Risk Patients.

Disaggregation: Age^g, Gender, CVD risk assessment.

PI22 Cervical screening recorded

Clients aged 25-74 who have not had hysterectomy & who had an HPV test within the past 5 years.

Data entry field:

1. Report > National KPI
> PI22 Cervical Screening;
2. Report > National KPI
> PI22 Cervical Screening Patients.

Disaggregation: Age^g

PI23 Blood pressure recorded (Type 2 diabetes)

Type 2 diabetes clients who had a BP recorded in the last 6 months

Data entry field:

1. Report > National KPI
> PI23 Diabetes BP Tests;
2. Report > National KPI
> PI23 Diabetes BP Tests Patients.

Disaggregation: Age^g, Gender.

PI24 Blood pressure result

Type 2 diabetes clients who had a BP recorded in the last 6 months & was ≤ 140/90 mmHg.

Data entry field:

1. Report > National KPI
> PI24 Diabetes BP Results;
2. Report > National KPI
> PI24 Diabetes BP Results Patients.

Disaggregation: Age^g, Gender.

PI25 Sexually transmissible infections

Clients aged 15-34 who were tested for one or more STIs within previous 12 months.

Data entry field:

1. Report > National KPI
> PI25 STI Results;
2. Report > National KPI
> PI25 STI Results Patients.

Disaggregation: Age^f, Gender.
